SUMMARY

Solutions-oriented Full Stack Developer specializing in the MERN stack and Generative AI integration. Proven track record in leading development teams for major academic projects, architecting scalable microservices. Strong in REST API design, performance-focused engineering, and building production-grade SaaS platforms.

TECHNICAL SKILLS

- **Languages:** JavaScript, Python, Java, PHP
- **Frontend:** React.js, Redux Toolkit, Tailwind CSS
- **Backend:** Node.js, Express.js, REST APIs
- **Databases:** MongoDB, MySQL, Vector DB, Redis
- **Cloud & AI:** AWS, Docker
- **Tools:** Git, Postman, JWT, OAuth

PROJECTS

Lumina | Frontend Backend 2026

- Engineered a **multi-tenant SaaS architecture** from scratch using the MERN stack, implementing resource isolation and dynamic workspace rendering for diverse user tiers.
- Developed a sophisticated **Global State Management** system with Redux Toolkit to handle complex dashboard data, ensuring consistent UI states across nested routes.
- Implemented a high-security **Authentication Framework** using JWT and HTTP-only cookies, featuring automated token refresh logic and role-based access control (RBAC).
- Optimized **Full-Stack Data Orchestration** by designing standardized RESTful API contracts, reducing redundant network requests and achieving fast frontend rendering.

Bitezzzy | Frontend Backend 2025-2026

- Architected a responsive and high-performance UI using **React and Tailwind CSS**, implementing custom hooks for efficient state management and data fetching.
- Developed a seamless **REST API integration layer**, utilizing Axios and asynchronous redux to handle real-time AI responses from OpenAI LLMs.
- Engineered a sophisticated **UI/UX workflow** for the recipe discovery engine, focusing on intuitive navigation, form validation, and accessible design principles.
- Implemented complex **frontend-side filtering and search logic**, ensuring low-latency interactions when querying large datasets of global cuisines.

EXPERIENCE & LEADERSHIP

Team Lead - Major Academic Project 2023 – 2024

B.Sc. Computer Science

Kolkata, India

- Spearheaded a 4-person development team to design and deploy a comprehensive software solution for the final year project.
- Managed the full SDLC, including requirement gathering, system design (UML), and agile sprint planning.
- Conducted code reviews and mentored team members on MERN stack best practices.
- Delivered the project ahead of schedule, receiving high commendations for technical implementation and UI/UX.

EDUCATION

Master of Computer Applications (MCA) Expected 2026

Techno Main Salt Lake (MAKAUT)

Kolkata, India

Bachelor of Computer Science(H) (BSc) 2021 – 2024

New Alipore College

Kolkata, India

CERTIFICATIONS

- **Advanced Distributed Systems** - NPTEL Certification (2025)
- **Full Stack Web Development** - Apna college (2025)
